**Events are subject to change based on COVID-19 impacts.

2020 Competition Timeline

Screening and Judging Process

Once all Final Submission Forms are received, the LHFT Steering Committee will convene virtually to review submissions and select the most promising entries for the in-person judging event. Entrants selected to move on to the in-person judging round will be contacted and asked to ship their entries to the UL facility (address will be provided to finalists). Please note that HVAC equipment should not be shipped, only the accompanying thermostat. Entries will be judged in-person by a diverse panel of experts. See the product-specific Entrant Guides for more information on the evaluation criteria.

Promotion of Award Winners

The winners will be announced during several awards ceremonies. These products will be promoted throughout the ensuing year through the *Lighting & Homes for Tomorrow* [website](#), social media (Facebook and Twitter), articles and press releases, materials produced by the LHFT organizers, and product displays at key industry events.
